

HEAVY DUTY DUAL COMPONENT MANUAL APPLICATOR GUN 1:1 RATIO, 200/300ML CARTRIDGES

Universal applicator gun for use with 1:1 ratio 300 mL and 200 mL cartridges only. Built-in cartridge stabilizing plate for extra support. Extra durable, heat-treated piston rod. Precision sintered friction plate. Easy release star-burst reverse gripping plate. Zinc alloy handle. 26:1 Thrust Ratio.

APPLICATOR GUN MAINTENANCE

After every use, always clean off any material using the manufacturer's recommended solvent before it had time to dry.

To ensure optimum performance, pins in the handle should be lubricated with oil (WD40 or comparable) after every 10 cartridges.

GENERAL INSTRUCTIONS

1. Press thumb release plate and pull back push rods all the way out to the "home" position.
2. Release thumb release plate and rods will lock in their home position.
3. Load the cartridge into the gun. This gun will accommodate a variety of cartridge styles. Determine the best fit at the front of the gun and then align the push discs to center of the plungers and pull the trigger to move the discs forward until they are snug against the plungers.
4. Remove the cap and plugs from the nose piece.
5. Pump the gun until product flows equally from both chambers. This procedure equalizes the pistons to ensure an equal mix.
6. Install the static mixer on to the nose piece and tighten. Pump the material through the static mixer. Discard the first 3 inches, then proceed to application.

Designed for high viscosity products.

Provides extra thrust and power

1:1 ratio cartridges only

Mechanical advantage 26:1
